NEW CANADIAN AIR LEAGUE
A new Air League has been formed by Canadian aviators, similar in scope and function to the Air League of the British Empire, and Colonel P. H. Mulock, one of Canada's foremost aviators, has been appointed on the Provisional Committee as the chief representative of Western Canada.

Induction Service at United Church

Rev. H. C. Wood Officially Installed

On Thursday evening, September 15, an induction service was held in the United Church, Oyen, when Rev. H. C. Wood was officially installed as pastor.

A pleasing and impressive service was jointly conducted by Rev. Harry S. McDonald of Youngstown and Rev. A. G. Gay of Cereval, the latter delivering a message to the new pastor, while the former addressed the congregation. The church was beautifully decorated for the occasion and the service was well attended.

After the service Mr. W. T. A. Walker, representing the trustees, officially welcomed Rev. and Mrs. H. C. Wood to Oyen, and gave a resume of the work of the church here. Mr. George A. Morrison, reeve of the village welcomed the pastor and his wife to Oyen, on behalf of the citizens. Miss Marjorie May, representing the choir, faintly presented Mrs. Wood with a bouquet of flowers.

Following the addresses, of welcome the remainder of the evening was given over to a pleasant social.

During the induction service Mr. Robert Nisbet pleasingly rendered a vocal solo, "Rock of Ages".

Everything Ready for School Fair

Preparations are all complete for the school fair which will be held in Oyen to-morrow.

It is expected that keen competition for Dr. McPhail's cup will be a feature of the fair.

W. J. JACKSON
Who for a number of years has been a director of the Alberta Wheat Pool, has been appointed South American representative of the Canadian Wheat Pool. He sails from New York this month for Buenos Ayres.

WORLD FLIGHT ABANDONED.
William Brock (top) and Edward Senies (lower), of Detroit, who have abandoned their attempt to fly around the world in record time. They had reached Tokyo, Japan, a distance of 12,275 miles, and had to cross the Pacific Ocean to complete the trip.

Local Returned Men Will Stage Banquet and Reunion

At a meeting held last Saturday night, local "returned" men decided to go ahead with preparations for a grand banquet and reunion to all "returned" men between Youngstown and Saskatchewan boundary, to be held in Oyen on Armistice night.

Messrs C. Stewart, H. R. Chapin and William Irvine were appointed to take charge of the arrangements, and a general organization meeting is called for Saturday, October 1, at 8:30 p.m. to draw up a program for the occasion.

Canada a Land of Opportunity

"Canada today possesses the opportunities which the United States possessed 50 years ago, and this specially applies to the four western provinces, British Columbia, Alberta, Saskatchewan and Manitoba. These provinces, containing an area equal to about one-quarter of the entire United States, abound in great virgin forests, rich deposits of coal, iron, copper, zinc, lead, gold, silver, and millions of acres of the finest wheat-growing land in the world."—Roger Babson, American Statistician and Economist.

At The Theatre

On Thursday, Friday and Saturday, this week, (September 22-24), "Monte" the spectacular British picture, will be shown. This magnificent film gives a complete pictorial account of the epic retreat from Mons. Added, Col. Lindbergh's "Race for Paris."

"Gummy Side Up" with Vera Reynolds as star, is booked for Monday and Tuesday next week. A sure cure for the blues. Coming: "The Fire Brigade".

Fight the Fire Fiend

The week commencing October 9 has, by proclamation published in the Official Gazette at Ottawa, been declared Fire Prevention Week throughout Canada. The object is, of course, to focus public attention upon the enormous losses, both of life and property, resulting from fire with a view to the adoption of more effective safeguards against fire, and to educate all people, and especially children, against habits of carelessness in the handling of matches, gasoline and other combustible, and in the disregard of common-sense methods in the matter of extinguishing camp fires, and such similar matters as throwing away the still lighted ends of cigars and cigarettes.

At first glance it would seem to be quite unnecessary for the national government to officially set aside one week out of every fifty-two for the avowed purpose of teaching a presumably intelligent, educated and business-like people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire record proves conclusively that it is only too necessary to keep up a persistent campaign to awaken the people from their carelessness and indifference to this very vital matter.

Canada, which is so progressive in many ways, and has taken the leadership in numerous worthwhile movements, and can claim the honor of achievements, occupies a low place among the nations in the matter of fire statistics. Of fire losses are studied. Few countries, if indeed, any one, annually record the appalling fire losses which take place in Canada. This Dominion's fire loss per head of population is about the highest in the world, and the passing years do not reveal much improvement.

Canada has already sustained the loss not merely of millions but actually millions of dollars worth of forest wealth, some of which is gone forever, and where long periods of time will be required to make good the loss in other districts. And these forests are one of Canada's greatest assets — one of the principal factors today, and for the future, in building up the Dominion's greatest industrial enterprise and providing a very large percentage of the Dominion's export trade.

The fire fiend takes a yearly, monthly, almost daily toll of human life, as well as leaving behind it a trail of lifelong suffering and economic loss in blinded and crippled humanity.

Because of the high rate of fire losses, the people of Canada have to pay abnormally high rates for fire insurance. The insurance companies are not to blame for demanding high premiums. They must protect themselves and their policy holders, and just so long as fires in Canada remain so numerous and costly, so long will the cost of insurance against fire remain a heavy drain upon the business of the Dominion.

Then, too, there is the further heavy burden imposed upon all urban communities in the maintenance of elaborate and expensive fire-fighting equipment, and large expenditures to augment water supplies for fire-fighting purposes largely in excess of the daily domestic requirements of cities and towns.

All these forms of protection are necessary, and must be paid for by our tax bills. But because of the frequency of fires largely the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be maintained on a much more extensive and expensive scale than would otherwise be necessary.

Fire Prevention Week should, therefore, be observed all over the country. Special attention should be paid to the subject in all schools, while each individual householder should devote a little time to a thorough examination of his premises and make a close check-up of conditions in and around all buildings. Rubbish should be cleared away, unprotected stove pipes, electric wires, gasoline and oil supplies attended to, and every member of the family cautioned to exercise the greatest care in handling of matches and all combustible materials, lighted lamps, and in the making and extinguishing of fires. Finally, all property should be adequately insured notwithstanding all precautions that may be taken.

Attention to these important matters may save much loss and suffering in the future.

Giant Drifted DANGER

Expansion Of Gas Through Weather Conditions Causes Peculiar Accident

A peculiar accident to the giant dirigible Los Angeles occurred at her huge shipyard was moored at her mast in Lakewood, N.J. The temperature rose suddenly, causing the helium gas in her containers to expand rapidly, and the wind shifted 180 degrees in a few seconds. The result was that the ship threw her stern high into the air, almost at an angle of ninety degrees, and whirled around with the entire change in the wind. The temperature went back to normal rapidly, so that the gas again assumed its normal volume and the tail of the ship dropped down. Meantime, however, some gear in the ship was thrown about, causing some damage.

French Use Bicycles

Report Shows They Out-Number Automobiles Ten-To-One
The number of bicycles in use in France in 1925 amounted to 7,312,900, an increase of 5 per cent over 1924, according to Trade Commissioner or Louis Hail, Paris, in a report to the Detroit office of the Department of Commerce.

About half a million bicycles are now used in Greater Paris, the Department of the Seine having 476,665 registered, or two to every eight inhabitants. In the highly industrial departments of Northern France, one to every five bicycles are in use, or one to every four inhabitants. There are 19 times as many bicycles in France as automobiles.

Reconstructing Ruins In Palestine

Interesting Places Being Restored in Holy Land
There is no country where the excavator is so busy as in Palestine. The traveller to the Holy Land will in the next future be able to go to the life of ancient Capernaum, and all northern shores of the Sea of Galilee, and there stand within the very walls of the synagogue in which Christ preached to the people nearly two thousand years ago. At the present time archaeologists and others are engaged in reconstructing from the ruins the places of worship which the contention of the Gospel built for the Jews, the very one in which our Saviour taught.

Get Rid of HEMORRHOIDS (Piles)

Surgical operations for the relief of this can often be avoided by the use of Anusol Suppositories. You have been suffering from hemorrhoids for a long time. Anusol Suppositories have a twenty-five years' record of success in the treatment of the painful condition. Nothing induces or habit-forms in the Anusol formula. Safe for people of every age. Sold only in red sealed boxes. Ask your druggist or write us for a coupon, postpaid, for W.S. Canadian & Foreign Agency Company, City Building, Montreal.

Will Plead Law Cases In European Courts

American Woman Attorney Going To Paris, Athens and London

An American woman attorney will try cases in Paris, Athens and London while on a "vacation." She is Miss Grace H. Brown of Detroit, who plans to sail to Europe soon to carry out her legal plans. In Paris, Miss Brown will represent an American claiming \$100,000 from the Turkish government for land he alleges was confiscated. She has been retained in an immigration case in Athens and an involved estate will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

Toes Kept Free

From Sore Corns

When you notice any sign of callus on the feet or toes—that is, the little skin on a few drops of Putnam's Corn Cure. To take, and use it prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on "Putnam's" because it is the only corn cure that works—and roots out the corn.

Self-Sustaining Air Services

Probably the only two self-sustaining air transport routes operated during 1924 in the Empire were in Canada—those from Halleybury to the Rocky, and from Sioux Lookout to the Red Lake mining fields. These are in an absolutely commercial basis and have had no Government subsidies.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. These are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and croup, break down gastric localities, and are a refreshing sleep. It is possible for Baby's Own Tablets to have even the new-born babe, at they are absolutely guaranteed free from opiates or any other harmful drug.

Concerning the Tablets, Mr. Alex. H. Perry, Albany, N.Y., writes: "I always keep Baby's Own Tablets in the house for the children, and I have found them a perfect medicine for little ones." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Japan Needs Post Offices

Government Is Considering Plans For Increase in Number

More post offices are needed in Japan. For each 6,500 persons in the country there is only one post office. England and Germany have one to 2,000 persons. The Communications Department is considering plans for the increase in the number of offices and an appropriation is to be included in next year's Budget for the opening of 6,000 more post offices over a period extending ten years. At the end of ten years each village throughout Japan will have a post office all its own.

COLDS COST MONEY

FORTIFY YOURSELF AGAINST THEM

At work, in the "movie," or at any entertainment, if your neighbor has a cold and sneezes or coughs, the air is full of germs, and if you are not in good condition, you may become ill. The only protection you can have is to take resistance against disease forces. Take that splendid health tonic, DR. PIERCE'S GOLDEN MEDICAL DISCOVERY.

It is estimated that a sufferer from colds loses three days' time from work in a year. Coal Not Merely a Fuel

German Scientists Discover Many Valuable By-Products
European scientists appreciate that coal is not merely a fuel but contains raw products to make things out of," declared Dr. Thomas S. Baker, president of Carnegie Institute of Technology, upon its return from a trip abroad.

Coal's potentialities are particularly appreciated in Germany, according to Dr. Baker, where it has been a most striking development in synthetic fertilizers in connection with the overgrowth of the food and progress has been materially increased.

"A great deal of the enormous success that the German Chemical Trust is having comes about the chemistry of coal," Dr. Baker said.

"While Germany has lost its monopoly of dyestuffs, it is developing other processes that are of great importance to modern industry. This trust is said to be producing synthetic cellulose and commercial bases."

Canada Favored For League Seat
London Paper Says Dominion Well Qualified For Seat On Council

The London Observer, commenting on Canada's candidacy for a seat on the League Council, says it is hard to pick another candidate more powerfully qualified for the privilege.

The great war was warrant enough of Canada's capacity for international service and she has played other parts since then.

As a member of the League, Canada has already, continues the Observer, Canada ranks high in the list of candidates. Above all, it would be valuable for the league to have for the first time a direct representative from North America upon the council.

It Will Prevent Ulcerated Throat.
At the first symptoms of sore throat, which precede ulceration and inflammation, take a spoonful of Dr. Williams' Pink Pills. Add a little sugar to it to make it palatable. It will allay the irritation, relieve the inflammation and astringent, which are so painful. These who were to attack the throat to quickly have thus made themselves immune to attack.

Antiseptic Perfumes
Perfume and Toilet Preparations Have Distinct Antiseptic Value

More important than the agreeable sensations carried by the delicate nectar to the brain and their effect on the nervous system is the hygienic value of a perfume and a toilet preparation, states the N.H.I. service in a bulletin recently published. Nearly all perfumery favors are aromatic substances and as such are germicidal. The use of perfume no doubt lessens the infection that threatens in crowded covered spaces even if freely cleaned by chemicals such as carbolic acid, formaldehyde or chloride of lime. Alcohol between 40 to 50 per cent strength is a strong antiseptic and increases the germicidal action of essential oils. Rose-water, owing to its content of phenylalcohol, which can be made synthetically, is used as a sleeping potion for children and as a toilet preparation for the elderly.

Punished For Cruelty
We wonder what some of our courts would say to a fine of ten dollars and costs of twenty-five more for scraping a live carp with a curry-comb. Yet this was the punishment imposed upon a man in the English Police Courts. Some people think a fish is not an animal.

The oldest university in the world is that at Pavia in Italy, founded in 825 A.D. by Lothar, grandson of Charlemagne.

One day's exercise with a wood saw is worth two weeks of physical culture.

Drives away pain — Minard's Liniment.

Defies Alpine Climbers

Mount Robson Is Still Victor Over Mountaineers

Mount Robson, giant peak of the Canadian Rockies, this year has turned back every party of Alpineists who have attempted to scale it. Two recent attempts were made by members of the Seattle Mountaineers' Club, but they too met with failure.

A driving rain and low-lying clouds were encountered by the climbers on their dangerous ascent from the valley floor. At high altitude they ran into sleet and then, when the weather cleared, they waded waist-deep through snow. Finally, when success seemed almost certain, they brought up against a huge icefall blocking the only possible approach to the summit.

The cliff is 100 feet high and almost perpendicular. The climbers said they would try again next year.

Bees Disturbed Church Service
Half Million Swarmed Under Roof in English Town

Bees have been known to swarm in many queer places, but one of the strangest places was that of a church where about half a million strong that settled beneath the roof of Rossington Church, near Doncaster, England.

So great was the noise of their humming that it could be heard above the sound of the organ and the voices of the choir and congregation.

To remove them a bee expert had to cut away a part of the roof. He discovered a solid mass of bees six feet by four feet. Smoke bombs had to be used to overcome the swarm, and only a mask and gaspnet protected the man from the infuriated insects.

Asthma Is Torture. No one who has gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how uncomfortable the relief provided by that marvelous remedy, Dr. Williams' Pink Pills for Pale People, is.

Asthma Remedy. For years it has been relieving the most severe cases. If you are suffering do not wait a day in securing this remedy from your druggist.

Place For Garnet Wheat
New Variety Is Giving Good Account Of Itself This Year

"Garnet wheat is giving a good account of itself this year," said L. H. Newman, Dominion cerealist. "The first earshot of wheat delivered on western railways shows this variety," he declared, "and I am pleased to hear that the demonstration farm at Raymond cut Garnet wheat estimated to run 40 bushels to the acre, two weeks earlier than the average cutting." Mr. Newman said it might, although he had carried on the closing experiments which resulted in the production of Garnet, he was not making undue claims for it. It is still very strong, Mr. Marquis as the standard wheat, but believes there is an important place for the earlier-maturing Garnet.

Some men waste a lot of valuable time explaining their actions.

Treat Colds 2 Ways

With One Treatment RUBBED ON THROAT AND CHEST, VICKS does two things at once:

(1) It is vaporous and the body heat and inhaled direct to the inflamed air passages, and

(2) It stimulates the skin like an old-fashioned plaster and "draws out" the soreness.

VICKS VAPORUB
OVER 75 MILLION JARS USED YEARLY

Was Descended From Well Known Character
Direct Descendant Of Jack Horner Dies in England

St. John Horner, lord of the manor of Wells and died recently in Somerset, England, at the age of 81. Jack Horner, of nursery rhyme fame, was steward of the temporalities of the great Somerset Abbey of Glastonbury.

At the dissolution of monasteries, tradition says the pit into which he put his thumb contained the seeds to the manor of Wells, which was the plan that Jack pulled out and made himself owner of a large slice of monastic lands. Wells Park has been in the family nearly 500 years, and the eldest son has always been named John.

Minard's Liniment eases sore feet.

A Dominion exhibition, primarily advertising Australia, but on the lines of the Empire exhibition at Wembley, London, in 1925, it is to be held at Sydney, probably in 1931.

The first year's salary of an early Michigan circuit rider consisted of hay, oats, milk, molasses and cash to the extent of \$118.

It keeps in the Opened Tin

RADIO IS BETTER WITH BATTERY POWER

DOMINION NOW HAS A SEAT ON LEAGUE COUNCIL

Ottawa.—Canada and Cuba were elected to the League of Nations Council. Three seats were to be filled, and Finland took the third.

Canada, Cuba and Finland will all for three years on the council, which now is composed of 14 members. The other members are Great Britain, France, Italy, Japan and Germany, which hold permanent seats in perpetuity, and China, Colombia, Chile, Honduras, Poland and Holland, who are non-permanent members.

The new line-up means that the council contains four countries representing the American continent and has created special interest among many delegates because of the particularly friendly relations existing between Canada and the United States. From another standpoint the election creates interest in an equally Canada as a member of the League of Nations. Hence, in the view of numerous delegates, the importance of the British Empire on the council is increased, although the question of Canada's right to elect an independent member of the League of Nations.

The three new members will take seats immediately, replacing Belgium, Slovakia, Salvador and Belgium, whose term has expired.

Prestensibly Senator Raul Dandaneau will represent Canada on the council. He was president of the 1925 Assembly; he speaks English and French with equal facility and is popular in Geneva political circles.

Dr. Aristides Agiero Dethanott, Minister to Havana, probably will be elected to Cuba, and the Hon. J. H. McCreery, Minister to Mexico, will be one of the most prominent figures in league activities and served as president of the recent International Conference on Transit and Communications.

Canada won her victory by a narrow margin, getting 26 votes or one more than the necessary majority. Cuba led the poll with 40 votes, and Finland came second with 32.

No Alberta Coal For Ontario

Finding Of Rail Commissioner Will Make Price Prohibitive

Ottawa.—The finding of the commission at once kills all hope of sending Alberta coal to the Ontario market, said Jesse Gough, Drumheller coal operator.

Mr. Gough said that to the \$12.20 per ton mentioned as the inclusive cost of the shipment to Ontario, would have to be added the actual cost of coal at \$2.75 per ton, which would bring the figure up to \$15.95.

That would mean that the profit of the retailer in Ontario which would run from \$2.50 to \$3 per ton. That would mean, he said, that Alberta coal would have to be sold at a price of \$18.45 per ton, at which figure it would be placed entirely out of court, and the Ontario coal which was being sold from \$15 to \$16 a ton.

"There is now no hope of capturing the Ontario market for Alberta coal," said Mr. Gough, "as this cost could not be met unless there was a flat rate of 47¢ per ton established."

Insured For Millions

167 Persons In U.S. and Canada Carry Heavy Policies

New York.—The lives of 157 persons residing in Canada and the United States are worth \$1,000,000 or more each to insurance companies, according to a survey made lately by the Spectator Company of New York.

Rodman Wanamaker, merchant heads the list with \$7,500,000 in policies. Several persons including Mr. F. G. Harding of Toronto, discoverer of insulin, are insured for \$5,000,000 each.

Farmers Seek Representation
Winnipeg.—Appointment of a western farmer to the House of Commons in October, is being urged by the Commissioner in place of Commissioner of Agriculture in communications forwarded to the federal government. The council also has suggested the membership of the House should be enlarged to seven, and that at least three members should be from Western Canada.

The most illiterate citizen in the world is Nafai, Africa, where 94.8 per cent of the natives can neither read nor write. Egypt and India have 92.7 per cent illiterate.

Good-Will Between Canada and U.S.

No Room For Distrust Says Hon. William Phillips

Ottawa.—There is no place for distrust or misgivings between Canada and the United States, declared Hon. William Phillips, U.S. minister to Ottawa, in a speech before a committee of the Canadian Club, and delegates to the annual conference of the Association of Canadian Clubs, at a luncheon here.

"It is an easy matter for us to understand one another," he said, "because our interests touch at same points and because already we are thoroughly well acquainted. We are in no sense foreigners to each other, yet we still have much to learn, one from the other. Already we have gone a long way on the road toward mutual cooperation but we still can go even further."

"Much of the sorrows and sufferings of the world would have been avoided in the past if nations had only found the courage to approach their international problems in an attitude of reasonableness and fair play."

"With diplomatic relations now established and with good-will manifest everywhere, Canada and the U.S. are ready, I hope, to discuss all questions of mutual concern, as they arise, cheerfully and frankly, and in a spirit of helpfulness. In so doing we shall become the happiest illustration of what we hope civilization has for the entire world. For between our two countries there is no place for distrust or misgivings."

Liable To Dumping Duty

New Ruling On Imported Apples Has Effect

Ottawa.—Imported apples have been declared liable to dumping duty. A ruling issued by the Department of National Revenue holds that apples are to be considered as of class or kind produced in Canada until otherwise ordered.

This means that a special (or dumping duty) in addition to the regular duty, will be applied to imported apples. The dumping duty will be no more than the necessary margin between the difference between the appraised value and the purchase price, not exceeding 15 per cent of the appraised value.

Typhoon Devastates Japan

Four Hundred Dead and Many Injured By Tidal Wave

Tokio.—Four hundred persons are dead, 2,200 injured, and 700 houses destroyed in Kinkumoto, island of Kishiu, in consequence of the typhoon and tidal wave, according to reports from the Japanese home office. In Fukuoka, Nagasaki, and Kanazawa prefectures there were few casualties, but numerous houses were inundated and damaged.

When the typhoon struck Tokyo, several thousand houses in the low-lying districts were destroyed. Thirty children were injured when the roof of a schoolhouse was blown off.

Flee From Earthquake Area

Tourists Along Black Sea Coast Grow All Terrified

Moscow.—Thousands of panic-stricken tourists along the Black Sea coast were crowding all means of transportation in order to escape from the district which has been shaken by earthquakes in the past few days, causing death and injury in many districts. Late reports from Yalta say that 12 persons have been killed and 354 injured. Slighter shocks are still continuing in the region, the advices said. Relief measures are under way.

Should Lead The Way

Geneva, Switzerland.—The United States, France, Germany, Japan, Holland and the other dominant nations are urged to produce countries leading the way in curtailing the output of narcotics in the opinion of Colonel W. W. McCormack, of Boston, technical adviser of the Provan government, as expressed on behalf of Persia before the League of Nations social welfare committee.

Farmer Killed By Airplane

Pennsylvania, Ohio.—When a passenger airplane, just taking off from a new airport, struck his farm wagon here, Norman C. (Ned) "Buck" Hopkins, 66, and Oscar, 9, who were riding in the wagon, were injured.

Next Meeting At Edmonton

Saint John, N.B.—Edmonton, Alberta, was chosen for the next annual meeting of the close of the fifth annual meeting of the Associated Workmen's Compensation Boards of Canada here. The meeting of that city, was elected vice-president.

For Outpost Work

Miss H. R. Terry, R.N., Toronto, Ontario, nurse, left recently to begin work at the new outpost, All Saints' hospital, Akavik, North West Territory, which has been opened under the auspices of the Macdonald River diocese of the Anglican church.

TAKE MEANS TO PUT AN END TO CUSTOMS FRAUDS

Ottawa.—"We have had more evidence brought to light, so to indicate that in certain quarters there would be a revival of illegal practices once our commission ceased to exist. For the honest customs officers and others similarly disposed I think I can promise that other means will be devised and rigidly enforced for detecting such frauds, and that for the future when such frauds and illegal practices are discovered, they will be visited with swift and relentless punishment."

The above was one of the statements made by Chief Commissioner J. T. Brown, of the Royal Customs Commission, in a brief address at the close of the public sittings of the commission here.

"No doubt there have been some who have been guilty of defrauding the Crown of its just revenues and who have escaped the scrutiny of our investigation," he continued. "For such let me say this: more fact that they have thus far escaped exposure and prosecution must not be taken as any assurance that such practices can be continued with impunity."

POSTAL DEFICIT MUCH SMALLER THAN EXPECTED

Ottawa.—A deduction of postage rates provided by the budget of 1928 has resulted in a deficit in the Post Office Department, but it is about a million dollars less than was originally estimated.

For the fiscal year which ended March 31 last, the returns are being made up and the deficit is placed at \$1,000,000. The estimated shortage was about \$2,500,000.

It would appear from these figures that the reduction in the letter postage from three to two cents per ounce has increased the volume of letter mailing through the mails.

Simultaneously, a marked increase in the parcels post is recorded and a big business is being done. "Imagine the one third cut in the letter rate the result of the operations under the new conditions leads to the belief that in a year or two at least equilibrium will be established between postal revenues and expenditures."

Exodus Not Serious

Only Ten Per Cent Of University Graduates Go To States

Winnipeg.—The students of Canadian universities graduates to the United States is not as serious as it is held to be in some quarters, according to Sir Robert A. Falconer, president of Toronto University, in an interview here.

"I went into the matter quite carefully at one time," Sir Robert said, "and I found that, according to figures I got from various sources, that in Canada, the emigration of graduates did not exceed 10 per cent."

Sir Robert added that this exodus "is not such a terrible thing as it is made to appear; it supplies an outlet for our graduates." No one, he said, would hold that a university education if they did not get the opportunity to use it.

Sittings Of Railway Commission

Ottawa.—The Board of Railway Commissioners announced the following dates for sittings in Western Canada: Saskatoon, Oct. 10; Edmonton, Oct. 22; Vancouver, Oct. 19; Victoria, Oct. 22; Nelson, Oct. 21; Lethbridge, Oct. 27; Calgary, Oct. 23; Regina, Oct. 21; Brandon, Nov. 1; Winnipeg, Nov. 3; Port William, Nov. 5.

The Board of Railway Commissioners has been so successful in the Lethbridge district that it has been decided to place another 25 families there this fall. One of the present settlers has placed 120 acres in sugar beets, 58 acres in potatoes and 400 acres in wheat and other small grains from which his returns this fall should be close to \$15,000. There are eight families now working for him.

More Settlers For Lethbridge

Lethbridge.—The Canada Colonization Association has been so successful in the Lethbridge district that it has been decided to place another 25 families there this fall. One of the present settlers has placed 120 acres in sugar beets, 58 acres in potatoes and 400 acres in wheat and other small grains from which his returns this fall should be close to \$15,000. There are eight families now working for him.

Indian-Paleface Romance

This little lady is extremely attracted to the small Indian boy and perhaps even more to the gorgeous and unusual house he lives in—a typical Stoney Indian Tepee. So she has mastered her shyness and is tempting him with a few candies. The little Chitche is nothing less than to be tempted and meets her more than halfway. This pretty little incident occurred during the great Indian Day celebrations at the Dark Springs Hotel recently and was duly registered by a C.P.M. photographer.

Fast Steamer "Plane" Service Is Planned

Would Cross From New York To France In Four Days

New York.—The New York Herald-Tribune says that plans are nearly completed to launch an all-American combination steamship-aeroplane service between Montreal Point, Long Island, Plymouth, England, and Havre, France, with fast ocean liners that would make the crossing in four days.

The proposed line is to be incorporated as the New York, London, Paris Steamship Company, and will operate a fleet of ten 20,000-ton liners. The ships, which will resemble United States naval destroyers but about twice their size, will be driven at an average speed of 33 knots, but capable of attaining 35 knots. They will be about 800 feet long with an 80-foot beam and a draft of 24 feet 6 inches.

The new liners, to be used exclusively for passengers, will carry 400 first class, who will be accommodated in small cabins, slightly larger than Pullman car drawing rooms.

Victim Of Experiment

Scientist Meets Death While Testing Effect Of Anesthetic

Manchester, Eng.—A victim of his own scientific zeal, Dr. Henry Lawson Wilson, surgeon and anaesthetist with a British and American reputation, was found dead in his laboratory. His wife discovered the expert under a mask over his face before a machine which administered gas.

It had been Dr. Wilson's great ambition to obtain and prolong the anaesthetic effect, which is obtained momentarily when a person under an anaesthetic loses feeling yet retains consciousness.

Dr. Wilson's brother said the doctor believed he had sufficient will power to prevent himself from losing consciousness completely. Colleagues are of the belief that he must not have been experimenting on himself to discover the actual effects of an anaesthetic, which it was his conviction was the only way to obtain essential data.

REQUIRE MORE TRADE ROUTES FOR THE WEST

Vancouver.—"If Canada is to achieve her proper destiny as a great nation, the people of all sections of the country must realize that new trade routes must be established and hardy new settlers, no matter what their nationality, be brought in to develop the vast wealth stored in the great northern hinterland," Premier James G. Gardiner of Saskatchewan said in an address before the Canadian Chamber of Commerce Convention here.

"All Canadians must get a vision of the future of this country, for it is ours, and we must shoulder the burden and push on to the destiny that is ours," said the Premier of Saskatchewan, 55 years old, a pioneer homesteader from Ontario, thriving his 120 settlers with his picture of the Canada to come.

Projected Flight Cancelled

American Globe Circling Trip To End At Tokio

Tokio.—The projected flight of the American monoplane Flyer of Detroit across the Pacific on its globe-circling trip was called off here by its captain, Edward F. Schell and William S. Brock.

The decision to call off the flight followed a lengthy conference with aviation experts here and others interested in the undertaking. Many citizens from America, using the Flyer to stop at Tokio also carried weight. Brock and Schell finally concluded the attempt to negotiate the Pacific trip at Tokio was impracticable.

They will take an early boat for the United States and have their monoplane shipped for Lethbridge.

Woman Drowned At Sea

Carried Over Side Of British Liner By Huge Wave

Philadelphia.—Mrs. Cyril B. Mumford, 30, of 2000 Arden Park, near Hamilton, Ontario, was swept overboard from the deck of the British liner *Albatross*, 25 years old, on a voyage en route from England to this city.

Proposals To Outlaw War

New Idea Presented To League By Norway Delegate

Geneva.—A "voluntary universal arbitration" plan was introduced at the session of the League of Nations assembly convened on disarmament by Dr. P. Nansen, of Norway. The plan proposed a permanent interest in concrete development of the movement to outlaw war.

The plan makes all war between signatories impossible by granting settlement by an arbitration board of all disputes which are not handled by the world court, or are not settled by the Council of the League of Nations.

Royal Brothers Arrive Home

Southampton, Eng.—The Prince of Wales, looking very bronzed and fit and in excellent spirits, stepped ashore from the Empress of Scotland here, ending his trip to Canada. He was accompanied by Prince George. The Mayor of Southampton and other local dignitaries officially welcomed the two princes, who immediately boarded the train to London.

CANADA MAY DECIDE TO APPLY A QUOTA LAW

Ottawa.—Renewal of the agreement between the department of immigration and colonization and the Canadian railway and steamship companies by which the latter secure transport and place immigrants in Canada has yet to be accomplished for the coming year. Negotiations are still in progress, according to the officials of the department.

While no official declaration on the subject is obtainable it is believed that there will develop considerable opposition to inclusion in the coming year's agreement conditions similar to those of the agreement now about to lapse. The views of the present minister of the department, Hon. Robert Forke, have been frequently intimated.

Wholesale immigration without regard to placement or to the capacity of the country and its industries for assimilating large numbers of immigrants is not viewed with favor by Mr. Forke. He is, rather, a believer in the maintenance of a close liaison between immigration and employment.

Require More Trade Routes For The West

Vancouver.—"If Canada is to achieve her proper destiny as a great nation, the people of all sections of the country must realize that new trade routes must be established and hardy new settlers, no matter what their nationality, be brought in to develop the vast wealth stored in the great northern hinterland," Premier James G. Gardiner of Saskatchewan said in an address before the Canadian Chamber of Commerce Convention here.

Carried Over Side Of British Liner By Huge Wave

Philadelphia.—Mrs. Cyril B. Mumford, 30, of 2000 Arden Park, near Hamilton, Ontario, was swept overboard from the deck of the British liner *Albatross*, 25 years old, on a voyage en route from England to this city.

The tragedy was revealed when the vessel stopped here, bringing a tale of a stormy voyage and the husband and three children of the woman.

Mr. Mumford, a former British army officer, was returning with his family from a tour of England, Scotland and France when Mrs. Mumford, who had been on an upper deck of the vessel, was carried over the side by a huge wave.

Canadian Hunting Prospects Excellent

Canadian moose and deer hunting seasons are at hand and from reports reaching the tourist department of the Canadian Pacific Railway Company there is every indication that one of the best hunting seasons ever will be experienced.

Mike Bates sends down word from his camp at Metagama, Ontario, that if the hunters don't get their deer and moose this season they will have nothing to blame but their poor shooting. He says that moose are very plentiful and expects it to be a great year in every way. From Schreiber, Ontario, where John Handel, outfitter, has been operating, the reports are just as reassuring. Handel says that the game has increased in the Superior Game Preserve lying south of the C. P. R. line and a very considerable area and the surplus has crossed to the north of the tracks offering good hunting. He says that caribou are roaming the woods in increased numbers. As the C. P. R. line is the north boundary of the game preserve, hunters don't have to go very far for their quarry.

The new from Sheehan's Camp at Lake Penasag, southwest of Sudbury, is also much to the hunter's hark. Deer here are reported to be very plentiful. Reports turned in by guides of Ogive Bros. Camps on the Tobacco River, N.B., are to the effect that deer though very plentiful last season, show signs of much greater increase. The same word comes from A. J. Thomas at South Milford, in the Kedgwick game district.

The hunting facilities of the Yukon and northern British Columbia districts are worthy of special men-

tion. Caribou and hunters from the district of North British Columbia. 1. Blodgett in a den. 2. Calling a moose. 3. Bear about to swim a stream in the Rockies.

According to sportsmen who have hunted in all parts of the world there are no finer big game fields anywhere than those embraced by the Kluske Lake and White River and the McMillan River districts of the Yukon territory. In addition to the remarkable specimens offered by the hunter, these districts have an impelling attraction for the tourist, man or woman, who delights in exploring the wonders and beauties of Nature in wild and primitive country.

The big game inhabitants, according to locality, comprise White sheep, mountain goat, Osborn caribou, moose and three varieties of bear—grizzly, brown and black. Some magnificent trophies of all these species have been obtained in the past.

The Yukon game country is so vast in its extent that a great number of hunting parties can be out in the same season without ever being seen by one another. The Kluske Lake and White River district is reached from the East via the Canadian Pacific Railway through the world renowned scenery of the Canadian Rockies to Vancouver, thence by Canadian Pacific "Princess" steamer for an unobstructed run of one thousand miles to Skagway, Alaska, where change is made and journey continued by train over the White Pass and Yukon route to White Horse, Y.T., a distance of 110 miles. Hunting grounds are situated about 124 miles from White Horse, the train usually being made by automobile to Champagne Landing (35 miles) the first day, then the third day on to Bear Creek (35 miles) and then the third day on to Kluske Lake (34 miles) where the actual hunting commences.

About Town and Country

THE RAINFALL
Friday, September 16, .12 inch
Saturday, . . . 17, .06 inch

Mrs. Harry Rhys who was operated on in Oyen Hospital last week, is reported to be doing nicely.

Under instructions from Mr. F. L. Wilkenon, I will sell at public auction, a quantity of household effects in Oyen, next Saturday (September 24). Sale to commence at 2 p.m. B. H. Dial, auctioneer.

Mr. Jack Edwards of Excel, who has been in hospital for over a week following an operation, expects to return home this week end.

Mr. and Mrs. Sam K. Stillings, of Madelia, Minn., arrived in Oyen last Friday. Mr. Stillings is here for the harvest and will run F. J. Belliveau's threshing outfit.

Doris Shaw is making slow but satisfactory progress.

The dates set for the opening of University and fall examinations have been postponed for one week. Fall examinations are now set for September 30 (instead of September 23) and registration at University, October 3 (instead of September 29).

CARD OF THANKS

The family of the late John Robertson wish to thank their friends for the kindness and sympathy extended to them in their recent sad bereavement.

DEVELOPING NEW WHEAT
Herman Trele, the Canadian wheat king, is developing a wheat which will cause quite a stir in the grain-growing belts of both Canada and the United States. This new variety of wheat can be sown later and ripens eighteen days earlier than any present variety.

HUHN-MARFLEET

The wedding took place at Santa Anna, California, recently, at the First Presbyterian church, of Mrs. May Marflet, formerly of Oyen, Alberta, to Mr. James Stanton Huhn, of Los Angeles. After a wedding trip to Honolulu, Mr. and Mrs. Huhn will make their home in Los Angeles.

When the new Pool elevator is completed at Vancouver in December, that port will have an elevator capacity of 10,200, 000 bushels. Six years ago there was only one elevator with a capacity of 1,250,000 bushels.

"Granny" McDonald was busily engaged yesterday, digging up her garden truck. She presented the News with two fine potatoes each weighing 27 ozs. Her garden has produced wonderfully this season, and the potatoes, carrots, beets etc all made a great showing.

Mrs. Arthur Kerr, who underwent no operation in Oyen Hospital over a week ago, is making a good recovery and expects to return home the latter part of the week.

Born—To Mr. and Mrs. J. Sattre of Excel, at Oyen Hospital, on Friday, September 16, a daughter.

Miss Nancy Ferguson of Medicine Hat, is visiting in town.

THRESHERS BUSY

Threshing is starting in earnest this week. A few outfits commenced yesterday, more are starting to-day and by the end of the week practically all machines will be at work and streams of golden grain will be pouring into granaries all over the district.

Following the unsettled weather of last week outfits already in the field had to shut down. On Sunday and Monday the weather was fine with a dropping thermometer on the latter day, the mercury receding to freezing point early at night and round down on Tuesday morning registered 7 degrees of frost. Yesterday the weather was bright and sunny and although cool at night, there was no frost. Another fine day to-day—with good prospects for a spell of real fine harvest weather.

Coming soon to Oyen Theatre "The End of the Road" and the Dempsey Sharkey fight picture.
